

## How to create DVD's

- 1) Click on:

- 2) Choose location to "Save As".
- 3) Locate the Zip file and right click and choose "Unzip" or "Extract All".

-Tip: save to a location easy to find, like your desktop.

- 4) There will now be a unzipped folder on your desktop, this folder will include the two folders (Video & Audio) needed to create the DVD.
- 5) Open up your DVD burning software and drag these files into the software to make the DVD.

-Tip: if you have any issues making the DVD's, please consult your DVD burning software.

Please make sure you keep these files and dvd's with the upmost respect.
